

Stats

- At least 77% of traffic crashes are the result of driver error.
- Motor vehicle crashes are the #1 cause of death for 16-24 year olds at 48.5%.
- Nationwide, 43% of first-year drivers and 37% of second-year drivers are involved in car crashes.
- Advanced driver training has reduced that rate to 4.6% of first-year drivers, as determined in a four-year study.

Smart Driving

- Get Advanced Driver Training for all ages
- Smart driving position: hands at 9 and 3 o'clock
- Speed appropriate to laws and conditions
- Follow the 3-second rule (Watch Video)
- Look as far ahead as possible
- Know ABS (anti-lock braking system) operation
- Drive a safe, well maintained car
- Drive a vehicle with a low center of gravity
- If you are using your wipers, your headlights should be on as well

Be a Healthy Driver

- No impairment from alcohol, drugs, or sleep deprivation
- **Drowsy Driving:** www.nhlbi.nih.gov/health/prof/sleep/drsy_drv.pdf
- Don't tailgate
- Keep calm
- Back off from road rage: Learn to let go of anger and move on.

How do you deal with road rage? It is essential to keep calm while driving, and dealing with road rage is no exception. There are two main components when road rage is in-volved: you and the other driver. By maintaining a courteous mindset, we can make our roads safer by remaining confident and controlled and ultimately, safe on the road. Losing control of your emotions behind the wheel can mean losing control of your vehicle. It is important to learn to 'let go' when another driver becomes angry or angers us. Avoiding eye contact is a good start.

Avoid Distractions

- Do not use cell phones while driving; pull over, if necessary

Driving distractions are serious and have become an increasingly problematic issue, particularly with the ongoing use of cell phones and blackberries. At the least, a cell phone conversation while driving takes away much of your attention. More serious, and recently with fatal consequences, is text messaging while driving. Texting not only distracts drivers from the mental processes required for driving, but it forces drivers to look away from the road, often for extended periods.

- Music can be helpful to a driver, particularly on long journeys, however, it should be kept in mind that your focus is to be on the road at all times
- Do not allow extraneous distractions such as eating, reading, applying makeup, or using a PDA or game console
- Do not allow disruptive passengers to ride with you

In addition, the combination of loud music and chattering passengers can take our focus off the road. Things happen fast while we're driving, and keeping this in mind can reduce accidents and prevent the potential for tragic events that all too often occur due to driving distractions.

Wear Seatbelts

- Ensure that all seatbelts are fastened
- Wear your seatbelt:

It is safer. Seat belts save lives. You are less likely to be injured in a crash and will be better prepared to deal with an emergency situation if you are wearing your seat belt. If you need to take emergency action while driving, a seat belt can help to keep you better positioned behind the wheel so that you can more effectively maintain control of your vehicle.
